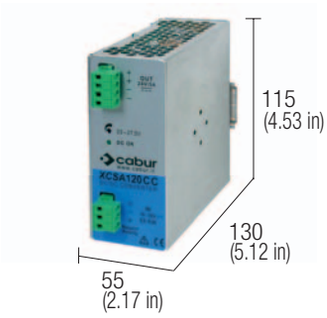
DC/DC Insulated converters output power 120 W

- DC wide range input
- Short circuit, overload, over temperature protection
- Compact design



NOTES

The depth dimension includes the terminal blocks and the DIN clamp.
(1) Inrush current is measured with input supplied by a battery; the current peak vary depending on the internal impedance of the current source and depending on cables and connections resistance.
(2) Over 50°C (122°F) apply a derating -3 W/°C, max 60°C
(3) According to EN60950 insulation tests on input side must be made only with DC instruments.
